ROCKER-EX[GD] Series

■ Ex ON-OFF SWITCHES/CHANGEOVER SWITCHES/PUSH BUTTON SWITCHES

The ROCKER-EX[GD] series has been designed for the command of lighting plants in areas classified as zone 1, 2, 21 and 22.

The presence of a potentially explosive atmosphere, from gas or dust, implies that every component is chosen with the due characteristics, in order to avoid the ignition of an explosion.

The ROCKER-EX[GD] series offers three functions: On-Off switch, changeover switch and push button switch.

Options are provided for all functions, such as a different number of entries or the possibility to select the type of cable gland, polyamide or nickel plated brass (for armoured or unarmoured cable).
