WFM36

The double fork sensor from SICK – all-in-one solution for shuttle positioning

The WFM36 double fork is a customized solution used for positioning shuttles in racks in intralogistics. In response to the high variety of systems on the market, SICK offers adaptation of the housing dimensions to meet your requirements.

Product description

The WFM fork sensors are extremely quick and easy to mount and commission thanks to plug and play. Their yellow receive indicator can be seen all the way round, providing optimum feedback on the switching behavior of the WFM. Since the sender and receiver are integrated within the same housing, there is no need for any complex alignment work, allowing detection tasks to be prepared and completed quickly and easily. WFM have a rugged aluminum housing and are available in five different designs with fork widths ranging from 30 mm to 180 mm and fork depths of between 40 mm and 120 mm. SICK's fork sensors are suited to numerous applications, such as detecting parts in production processes, checking whether various objects are present, or intralogistic processes.

At a glance

- Clearly visible red emitted light
- No setup required: The sensor is ready for operation immediately
- Receive indicator, visible all-round
- 5 fork sizes with a maximum depth of 120 mm and a maximum width of 180 mm
- Stable aluminum housing with IP 67 enclosure rating

Your benefits

- Fixed parameters guarantee a high level of operational safety with extremely simple commissioning
- A visible red light enables easy alignment of the WFM
- The all-round visible receive indicator enables constant process control
- A wide range of different fork sizes increases installation flexibility
- Stable aluminum housing for use in harsh industrial environments

Fields of application

- Detecting objects in production processes
- Monitoring the presence of different objects

SICK AT A GLANCE

SICK is one of the leading manufacturers of intelligent sensors and sensor solutions for industrial applications. A unique range of products and services creates the perfect basis for controlling processes securely and efficiently, protecting individuals from accidents and preventing damage to the environment.

We have extensive experience in a wide range of industries and understand their processes and requirements. With intelligent sensors, we can deliver exactly what our customers need. In application centers in Europe, Asia and North America, system solutions are tested and optimized in accordance with customer specifications. All this makes us a reliable supplier and development partner.

Comprehensive services complete our offering: SICK LifeTime Services provide support throughout the machine life cycle and ensure safety and productivity.

For us, that is “Sensor Intelligence.”
